

How to get the best results from the screening

Last Modified on 17/04/2023 12:15 pm CAT

Please follow the screening guidelines displayed at the start of the screening for best screening results, for example:

- clients need to be seated and at rest during the screening
- client's face needs to be fully exposed
- there should be no light source behind the client and no direct sunlight on their face
- there should be no light changes during the screening
