

# Are all smartphones supported for the reassessment?

Last Modified on 31/12/2024 10:29 am CAT

Most smartphones are supported. In general, all that is needed is a smartphone with a camera, but it does get technical. The guideline below will give an indication of the minimum requirements:

- **iOS**
  - Safari browsers on iPhone devices with version iOS 16.7 or above
  - Chrome browser with version 113 or above.
  - iPhone 11 and all iPhone devices released afterwards
  - iPad (6th generation) and all devices released afterwards, including iPad Mini and iPad Pro families.
- **Android mobile devices with**
  - Chrome browsers version 113 or above.
  - Camera frame rate 15 fps and resolution of at least 640 x 480 pixels
  - CPU - ARMV8-a
  - The device must have at least 3GB of RAM
  - Benchmark score based on the Geekbench 5 single-core results from [Android Benchmarks - Geekbench Browser](#)
    - 500 recommended device.
    - > 300 supported device.
