

How does the LifeReturns[®] reassessment work?

Last Modified on 31/12/2024 10:23 am CAT

The reassessment has two parts: a quick digital health assessment, followed by an optional fitness assessment (which involves a step test) that takes only a few minutes.

The digital health assessment can qualify you for a discount of up to 20%, and the optional fitness assessment can earn you an additional discount of up to 15%. We recommend completing both to maximise your discount.
